Creating Our Flask Application And Loading Our Model By Using Load_model Method

Team ID	PNT2022TMID32449
Project Name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

Creating our flask application and loading our model by using the load_model method

```python
app = Flask(__name__,template_folder="templates") # initializing a flask app
# Loading the model
model=load_model('nutrition.h5')
print("Loaded model from disk")
```
